Test Summary - Authorized Partner Signup Flow

Manual Testing Summary | https://authorized-partner.vercel.app/ | Date: 1 November 2026 | Tester: Komal

1. Scope

Complete signup flow: Home Page → Terms & Agreement → Step 1: Set Up Your Account → Email Verification (OTP) → Step 2: Agency Details → Step 3: Professional Experience → Step 4: Verification and Preferences → Registration completed. Deliverables in this folder: test_cases.xlsx (119 cases), test_execution_report.xlsx, bug_reports.xlsx (with screenshots), test_summary.pdf (this file).

2. Test Cases

Module / Page	Cases
Home Page + Home Page / Sign Up	5
Registration - Terms & Agreement	9
Registration - Step 1: Set Up Your Account	24
Registration - Step 1: Email Verification	17
Registration - Step 2: Agency Details	20
Registration - Step 3: Professional Experience	22
Registration - Step 4: Verification and Preferences	22
TOTAL	**119**

Types: Positive 40, Negative 45, Boundary 17, UI 17. Priorities: Critical 8, High 52, Medium 49, Low 10. Coverage includes the happy path (TC-119 end-to-end + login), negative, boundary, navigation (back / refresh / step-skipping), UI/UX, and duplicate-data cases (TC-24 email, TC-36 phone).

3. Execution Results (this round)

Executed	Pass	Fail	Not Run
119	101	18	0

Execution was done manually in a real browser, screen by screen, with a real email inbox for the OTP step. Evidence for every executed case is in test_execution_report.xlsx; failure evidence is the tester's own screenshots, reproduced in the appendix of this PDF and embedded in bug_reports.xlsx.

4. Bugs Found (17)

ID	Bug	Severity	Side
BUG-01	Next clickable during phone "Validating..." - invalid number reaches OTP page (TC-29)	Medium	Frontend
BUG-02	5-digit phone number accepted, OTP page opens (TC-28)	High	Both
BUG-03	Empty phone number shows no error message	Medium	Frontend
BUG-04	Empty phone gives false toast "User with this mobile number already exists!"	Medium	Backend
BUG-05	Invalid email shows only the browser pop-up, not the site's message (TC-23)	Low	Frontend
BUG-06	Valid website rejected when one space is typed before it - no trimming (TC-59)	Low	Frontend
BUG-07	Full https:// website address rejected - double-https with the field's prefix (TC-66)	Low	Frontend
BUG-08	Spelling: "Didn't recieve a code?" on the OTP page (TC-53)	Low	Frontend

BUG-09	Spelling: "Test Prepration" on Step 3 (TC-92)	Low	Frontend
BUG-10	WEBP upload accepted although not in the allowed-types list (TC-99/TC-112)	Low	Frontend
BUG-11	Password rules never shown before the user makes a mistake	Low	Frontend
BUG-12	Names accept numbers, symbols and extra spaces	Low	Frontend
BUG-13	No success message when a step is saved or after the final Submit (TC-75/TC-97/TC-100)	Low	Frontend
BUG-14	After removing all documents, Submit shows only "Required", not the document message (TC-115)	Low	Frontend
BUG-15	Back from Step 2 opens Step 1 in edit mode with all details empty (TC-71)	Medium	Frontend
BUG-16	Refreshing Step 4 opens Step 2 with blank fields instead of Step 4 (TC-117)	Medium	Frontend
BUG-17	An already-saved step cannot be submitted again - "already exists" message (TC-74/TC-78/TC-103)	Medium	Both

Full bug reports (steps, expected vs actual, severity, priority, side with one-line reason, evidence) are in bug_reports.xlsx.

5. Checked and Confirmed NOT Bugs

- Refresh reloads the last saved details, so details removed without clicking Next come back after F5 (TC-73) - expected saved-vs-unsaved behaviour.
- After Back from Step 3, Next on Agency Details opens Step 4 directly because Step 3 was already saved (TC-96) - resume behaviour.
- MP4 file is correctly rejected by the Step 4 document upload (TC-112).

6. Top Risks

1) Phone validation can be bypassed (BUG-01, BUG-02): invalid numbers can enter the OTP step. 2) Misleading server messages (BUG-04) confuse users. 3) Upload rules mismatch (BUG-10): the box text and the accepted types differ.

7. Not Tested in This Round

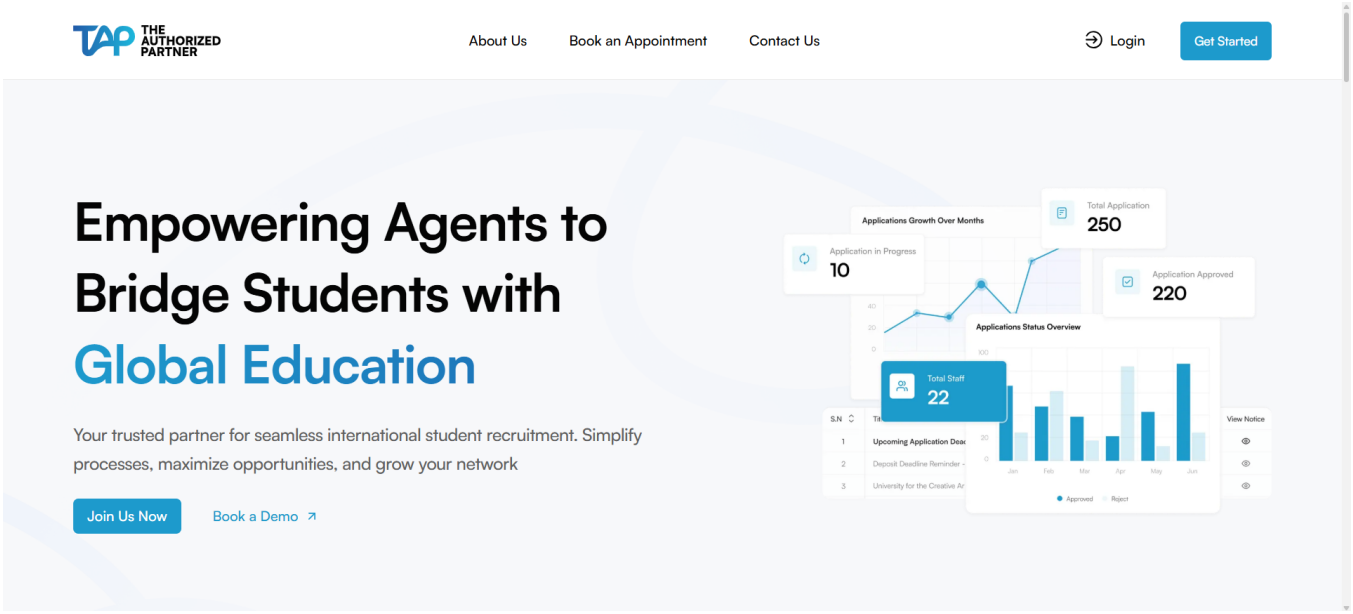

Automation (Part B) was not executed in this round. Full cross-browser/device matrix and load/performance testing of OTP and upload were out of scope. All 119 test cases were executed in this round.

8. Conclusion

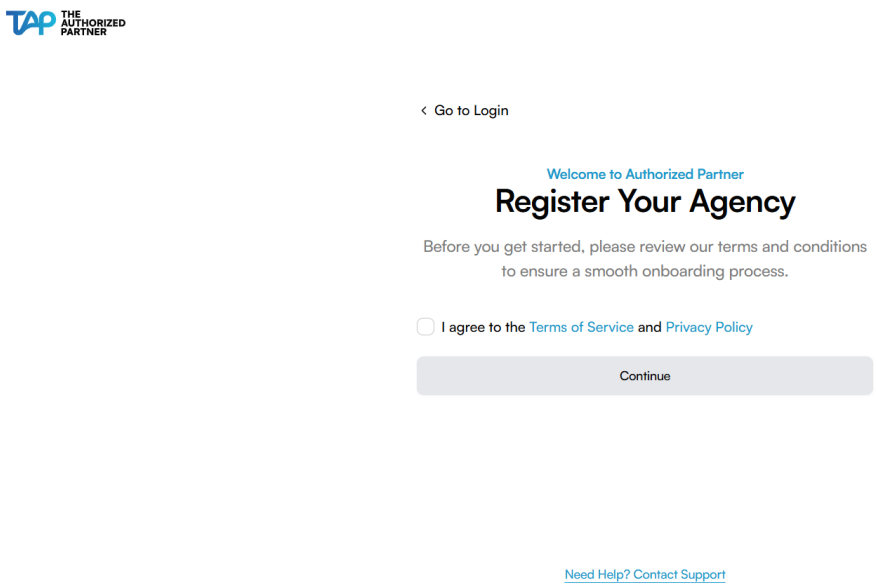

The signup flow works end to end with valid data, and step error messages are mostly clear and correctly placed. Defects are concentrated in frontend input validation (phone timing/length, website spaces and prefix, name characters), two spelling mistakes, and one upload-rules mismatch. BUG-01 and BUG-02 should be fixed first.

Appendix - Execution Screenshots (tester's own captures)

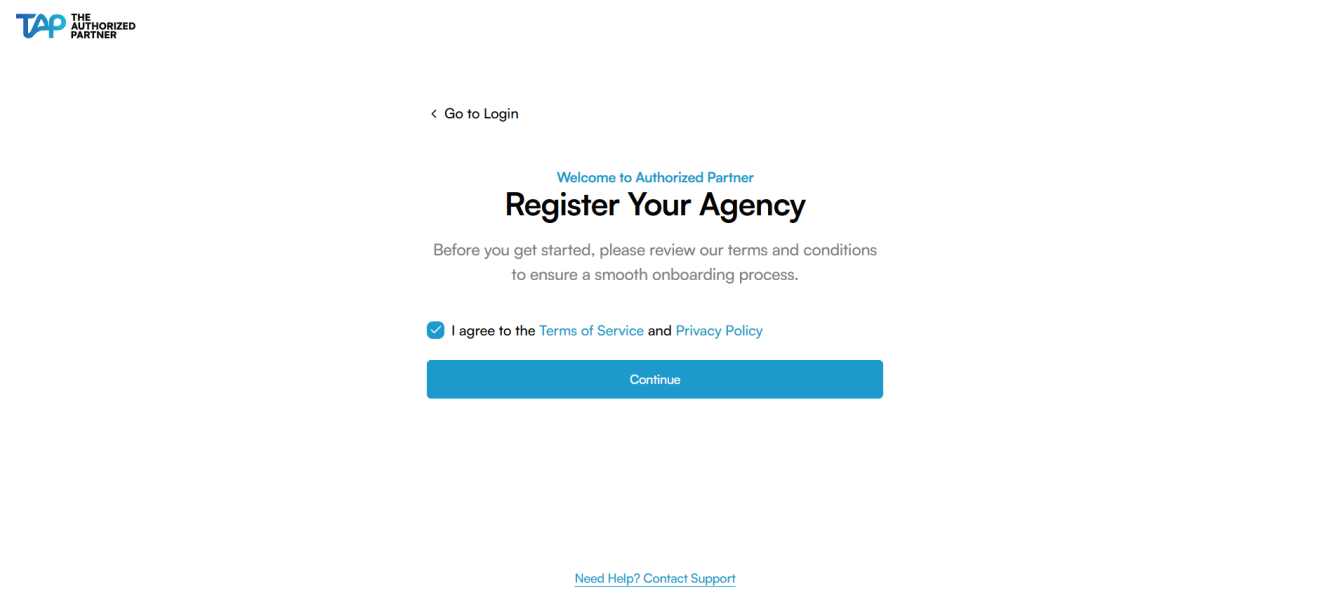

Screenshot-01 - Home page (TC-01, TC-04)

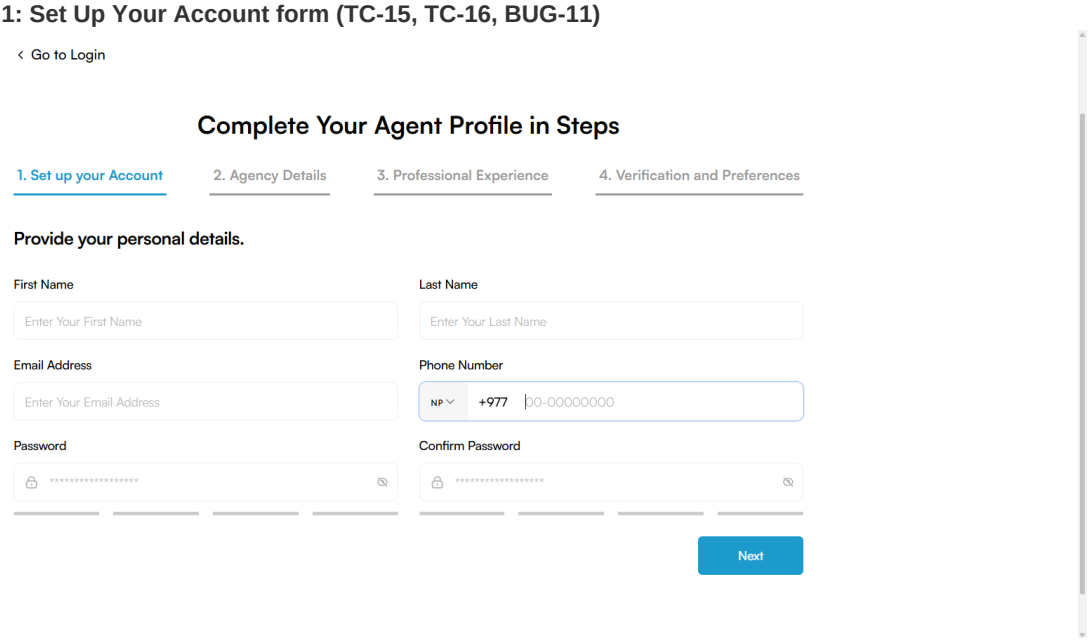

Screenshot-02 - Terms & Agreement, checkbox unticked, Continue disabled (TC-06, TC-11)

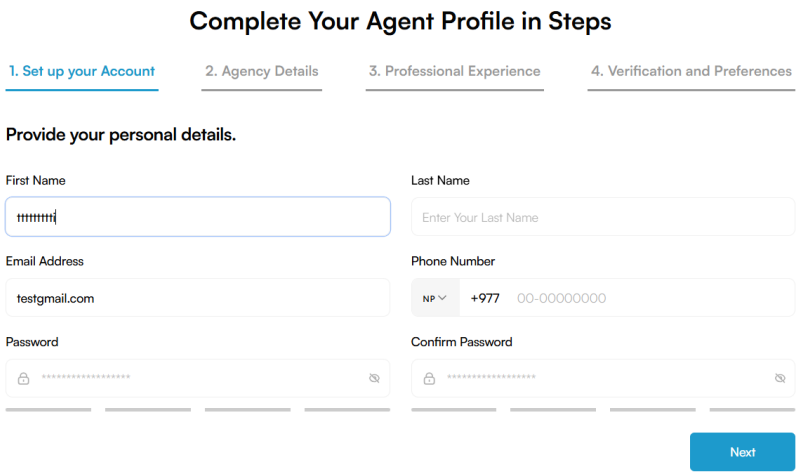

Screenshot-03 - Terms & Agreement, checkbox ticked, Continue enabled (TC-12)

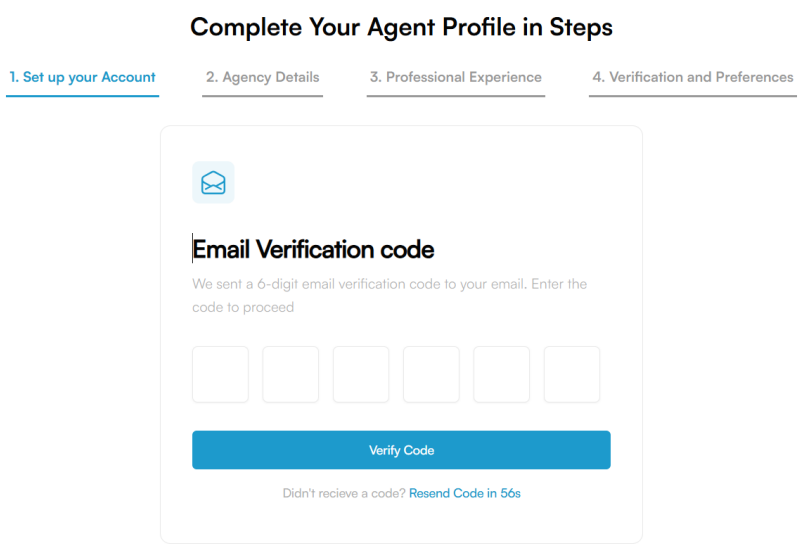

Screenshot-04 - Step 1: Set Up Your Account form (TC-15, TC-16, BUG-11)

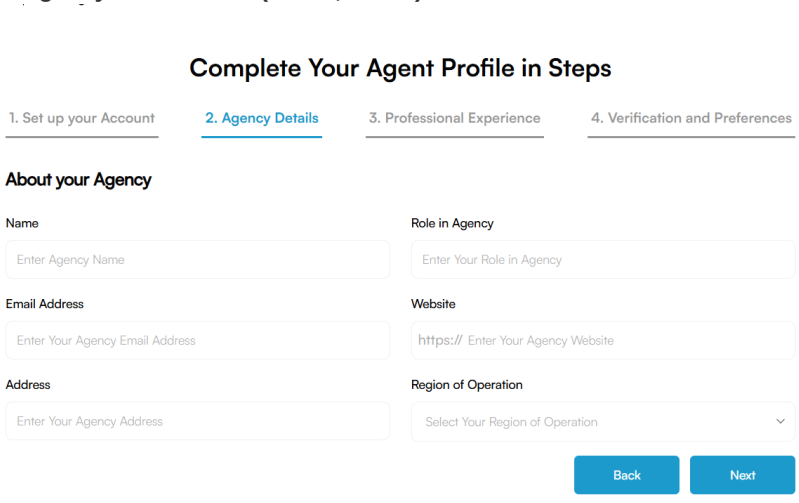

Screenshot-05 - Step 1 with invalid email test data entered (TC-23 / BUG-05)

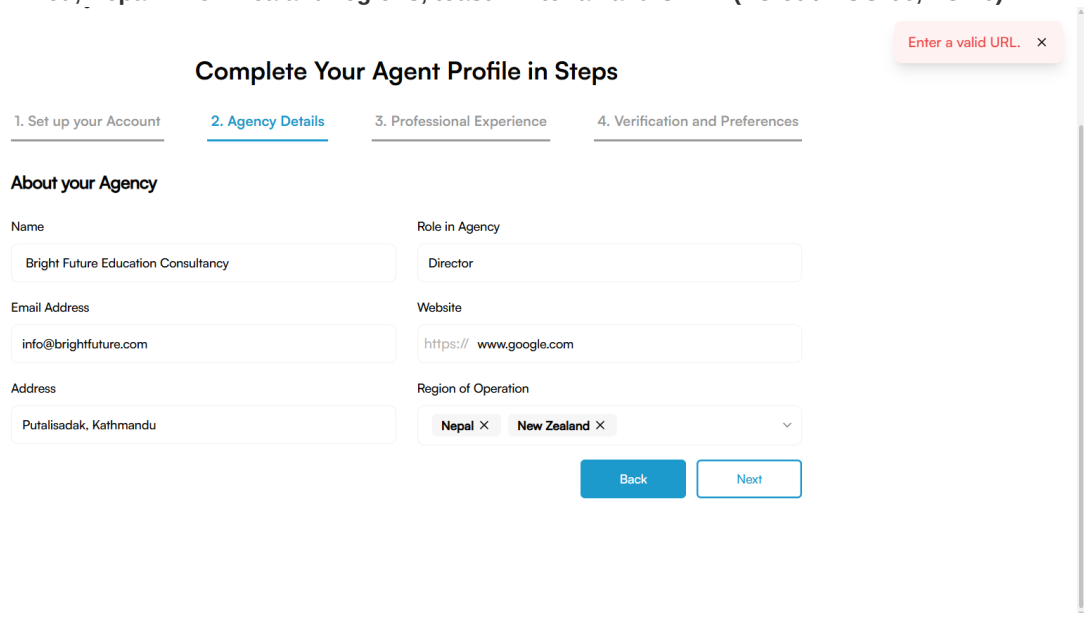

Screenshot-06 - Email Verification page - "Didn't recieve a code?" (TC-39-TC-53, BUG-08)

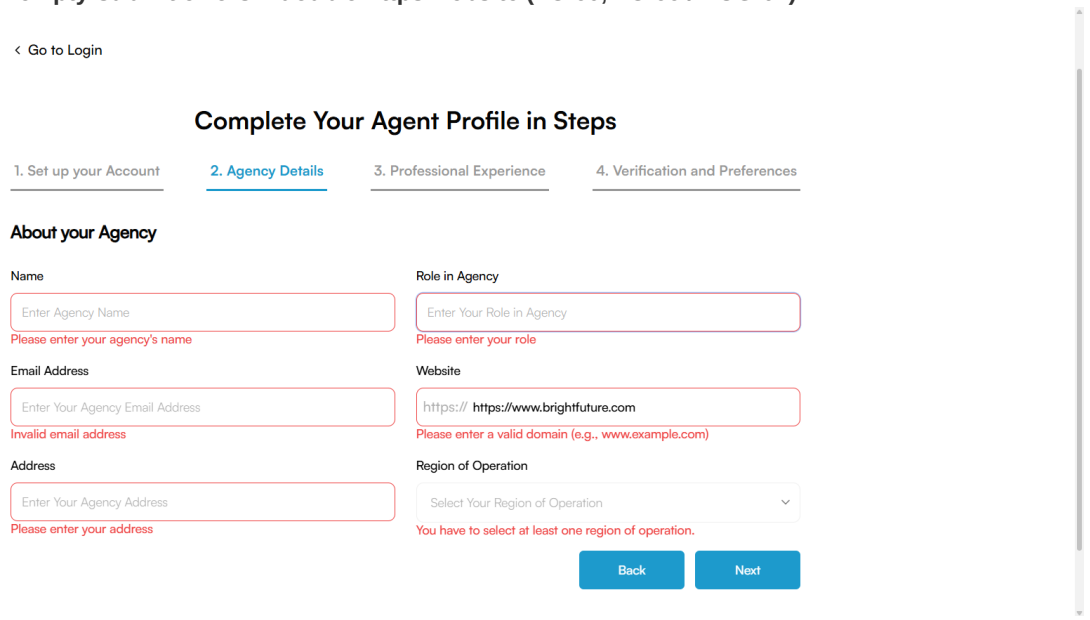

Screenshot-07 - Step 2: Agency Details form (TC-56, TC-57)

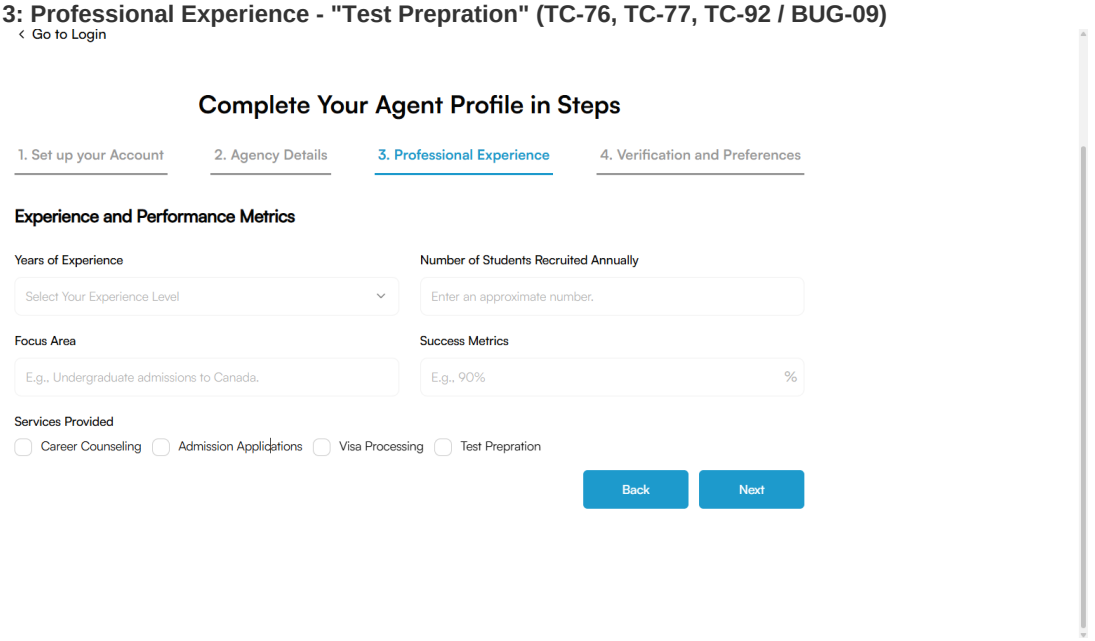

Screenshot-08 - Step 2 filled, Nepal + New Zealand regions, toast "Enter a valid URL." (TC-59 / BUG-06, TC-70)

Screenshot-09 - Step 2 empty-submit errors + double-https website (TC-60, TC-66 / BUG-07)

Screenshot-10 - Step 3: Professional Experience - "Test Prepration" (TC-76, TC-77, TC-92 / BUG-09)

Screenshot-11 - Step 4: Verification and Preferences, empty-submit errors (TC-98, TC-99, TC-101)
